

ONETRAC[®]

Single-Use Cordless Retractor with Integrated LED Light Source

obp[™]
simple, bright ideas.

Visualization, retraction and hemostasis during a surgical procedure is critical in reducing complications and infections. Avoid the costly and complicated reprocessing requirements of fragile fiber-optic cables. With the award winning **ONETRAC**, cordless access and illumination of the entire pocket is easily and safely achieved.

ONETRAC is an immediate and cost-effective solution for surgical procedures requiring access, illumination and exposure of a surgical tissue pocket. Illumination in the depths of a surgical tissue pocket or cavity can be met within seconds – no assembly, additional parts/components, or fiber-optic cables required.

PRODUCT FEATURES

- Disposable, single-use device reduces risk of cross-contamination
- On/off switch to preserve and maximize duration of peak illumination strength
- Integrated cordless LED light source produces no damaging heat and will provide peak power for 100 + minutes
- Integrated smoke evacuation channel
- Revolutionary reinforced nylon material provides exceptional strength and rigidity
- Angled tip with blunt distal end to maximize tissue adherence
- Lightweight for added comfort and ease of use

TIRED OF EXPENSIVE LIGHTED RETRACTOR SYSTEMS?

Today's lighted retractor systems cost thousands of dollars with hundreds more in ongoing disposable and/or reprocessing costs.

Each **ONETRAC** comes ready for use with everything needed to successfully retract soft tissue and illuminate a surgical pocket or cavity all at a fraction of the cost of other lighted retractor systems. No assembly, additional parts/components, or fiber-optic cables are required.
